

Service Offering

Architectural Technical Services

We partner with your project management team to identify critical design solutions while streamlining delivery and installation.

Concept and Design

Cladding Selection

Framing Systems

Conflict Detection

Layout Formatting

Cost Analysis

Project Engineering

Cladding Specific

Weight Dead/Live Loading

Constructability Analysis

NFPA 285 and Code Compliance

Region Specific Calcs

Project Specific Documents

Shop Drawings

Delegated Design

Production Documents

3D Modeling

Point Cloud BIM 3D Modeling*

**in lieu of traditional onsite measuring*

Custom Engineering and Manufacturing Capabilities

Our 65,000 sq.ft. facility offers wet and dry CNC fabrication for all cladding types and exterior rainscreen materials, along with in-house powder coating for precise custom color matching.

Fabrication Services

Project Specific CNC Fabrication

Hand Crafted Customization

Priority Area Focus and Delivery

Material Optimization and Sequencing
